

Solar Charging Kits

Charging Kits contain the parts you need to install a solar system on your trailer in a few simple steps. Retail ready with bright, informative packaging and easy-to-follow instructions. Available in 100 or 150 Watts, every kit includes an industry leading 30 Amp flush mount charge controller!

In Every Kit:

- High Efficiency Solar Panel
- 30 Amp Charge Controller
- Connecting Wires
- Mounting Brackets & Hardware

SCC-30AB

Solar Charge Controller:

- Flush mount design
- Battery equalization
- LCD indicates voltage, current & battery AH
- 8 charge settings for different battery types
- 4 stage charging with LED indicators
- Dual voltage capability 12v/24v

MODEL	SOLAR PANEL
SRV-100-30A	100W
SRV-150-30A	150W

DC-BTS-A-C

Battery Temperature Sensor

Temperature compensation ensures that batteries are charged to maximum capacity in cool environments, and are protected from over-charging in warm environments. Sold separately, for use exclusively with the SCC-30AB.
